

ROBOT'2015: Second Iberian Robotics Conference will take place at Lisbon, Portugal (November 19-21, 2015) and follows the First Iberian Robotics Conference held in Madrid in 2013. This previous and successful event, both from the viewpoint of their scientific and technical quality, and for the important number of attending delegates, have motivated us in organizing ROBOT 2015.

Robot 2015 features 21 Special Sessions, a Tech Transfer and Innovation Session and a Main Conference Track.
